

labels, pouches & bags

Specifications

Materials: The standard bags are made of PVC backed nylon. This material has a special "rip-stop" feature, which minimizes the risk of accidental cuts from tearing the bag further. The material is flame retardant and water resistant. The bags can also be made in other materials such as Codura, Plastolene etc.

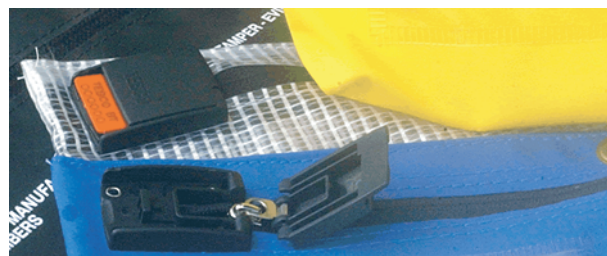

Locking: The locking of the bags is done by placing a security seal in the locking chamber which encloses a zipper. Whenever the bag is opened – the seal will be broken.

Standard colours: Green, Blue and Red. Other colours are available on request. Customisation of size, colour and marking is possible.

Applications: Securing of confidential documents internally in companies – and between companies and third parties like lawyers, accounting companies, trading partners and sister companies. Also to be used in the armed forces and intelligence bureaus.

Reusable tamper evident Security Bags

- 1 The head and the end of the zipper is fully enclosed in the locking chamber when the bag is sealed.
- 2 The locking chamber is riveted in 4 places. All the rivets are hidden inside the bag and inside the locking chamber, which make them inaccessible from the outside.
- 3 The zipper is reversed, so the teeth can only be put together from the inside of the bag.
- 4 The thread used for sewing is coloured to make it hard to replace.
- 5 Most types of superglue leave a white residue on the PVC material utilized for the bags.
- 6 A clear window for sender/receiver information is only accessible from the inside of the bag. The window is made from clear vinyl and is ultrasonically welded on the bag.
- 7 The security seal can be laser marked with permanent sequential numbers.
- 8 The bags can be individually printed with company name and/or number for easy identification.

Description

The reusable A4 Document Bag is specifically designed to secure confidential documents and sensitive information. The security bags are locked with an individually marked security seal which ensures high tamper evidence.

The A4 Document Bag easily holds A4 paper folders. If bags are to be used for hardback files, the size can be customized. Handles and customized identification can also be added to the bags.
